

Conserving Water in Your Apartment

Reduce Shower Flow

Ask your building manager to install a low flow showerhead. Also, spend a minute less in the shower.

Turn Off the Faucet

Turn off the water when brushing your teeth, washing dishes, or shaving. Also, ask your building manager to replace older faucet nozzles (aerators) with ones that use less water.

Wash Full Loads

Wash full loads, or choose an appropriate load-size setting for the number of items in the washer.

Report Leaks

Report water leaks to the building manager. Leaks can waste large amounts of water.

Reduce Outdoor Water Use

Use a nozzle on the hose, or wash the car at a commercial car wash that recycles the water. Use a broom instead of a hose to clean off the driveway or sidewalk.

*Use water-saving
showerheads and take
shorter showers.*

If you have any questions about water conservation, call (206) 684-SAVE (684-7283) or visit www.savingwater.org.

Thank you for saving water!
